

Metal Progress

Volume 79
January 1961 through June 1961

ALLEN G. GRAY, *Editor;*
Editor, Periodical Publications

CARL R. WEYMUELLER
Associate Editor

RALPH G. DERMOTT
Managing Editor

FRED L. SIEGRIST
Assistant Editor

ELIZABETH M. ALDRICH
Assistant Editor

FLOYD E. CRAIG, *Art Director*

Metal Progress Is Owned and Published by
THE AMERICAN SOCIETY FOR METALS
Metals Park, Novelty, Ohio

Subject Index

The subject headings used in this index are chosen in accordance with the ASM-SLA Metallurgical Literature Classification, International (Revised) Edition, published by the American Society for Metals, 1958.

- Age hardening**
Properties of Ni-Al Age Hardening Steel, by J. B. Seabrook..... 2-80
- Aging**
Aging Refractory Metals, by A. C. Ingram (d)..... 3-172
- Aircraft**
Adhesives for Fabricating Speed Capsules, by Harold H. Rosenbaum..... 6-80
AM 355 for Gas Turbine Engines, by Paul A. Bergman..... 5-79
Brazing Shortcuts for the B-58, by D. R. Torgeson and J. J. Kenna..... 3-121
Inspecting Jet Engine Parts With Eddy Currents, by R. L. Lipe..... 3-129
Inspecting Jet Engine Parts With Eddy Currents, by E. D. Reilly (c)..... 5-116
Metals and Fabrication Methods for the B-70, by Wayne A. Reinsch..... 3-70
Trends in Aerospace Manufacturing, by W. D. Nelson, J. A. Scott and R. H. Gassner..... 4-106
- Alloy steel**
New Carburizing Steels in German Automobiles, by H. U. Meyer..... 1-70
Properties of Ni-Al Age Hardening Steel, by J. B. Seabrook..... 2-80
- Alloy steel, fracture**
Brittle Failure of Strong, Tough Steel, by C. E. Mavrocordatos (c)..... 1-130
- Alloy steel, mechanical properties**
Strengthening A.I.S.I. 4340, by E. T. Stephenson and Morris Cohen (d)..... 4-150
- Alloy steel, nickel**
New Nickel Steels Exhibit Strength and Toughness (tn)..... 5-7
- Alloy steel, transformations**
Cooling Transformation Diagrams for A.I.S.I. 9260 and 4047, by R. C. Hess and D. J. Blickwede (ds)..... 2-100-B
Estimating Critical Ranges in Heat Treatment of Steels, by R. A. Grange 4-73
- Alloying**
A New Alloy Production Process, by G. I. Pogodin-Alekseev and V. V. Zaboleev-Zotov (d)..... 5-162
- Aluminum**
Aluminum Continues Uptrend in Auto Industry (tn)..... 2-66
Creep of Aluminum, by L. Raymond, W. D. Ludemann and J. E. Dorn (d)..... 2-164
Two-Pass Welding of Thick Aluminum Plates (tn)..... 3-66
- Aluminum, metallography**
Diallyl Phthalate as a Mounting Material, by C. A. Godden (c)..... 4-114
Improved Metallographic Techniques in Nova Scotia, by C. A. Godden..... 1-121
- Aluminum alloys**
Conductivity as a Measure of Physical Properties, by R. A. Chihoski, R. R. Jones, D. Hunter and D. D. Seltzer (d)..... 4-142
Drawing Aluminum, by Robert W. Bund (d)..... 4-185
Impurities in Aluminum Alloys, by N. D. G. Mountford and R. Calvert (d)..... 1-172
Materials and Fabrication Methods for the Bomarc, by R. H. Nelson..... 3-107
- Aluminum castings**
Chevrolet Adopts European Casting Process for Corvair Engine, Staff Report..... 2-84
- American Nuclear Society**
Nuclear Experts Meet on West Coast, by R. C. Bertossa (d)..... 6-140
- American Welding Society**
Welding Engineers Meet in California, by R. C. Bertossa (d)..... 4-124
Welding Engineers Meet in California, by R. C. Bertossa (d)..... 5-136
- Antifreeze solutions**
Corrosion by Antifreeze, by H. H. Collins and R. I. Higgins (d)..... 3-190
- Argon**
Pouring Degassed Steel in an Argon Atmosphere, by William Wilson..... 5-71
- Automobiles**
Aluminum Continues Uptrend in Auto Industry (tn)..... 2-66
Chevrolet Adopts European Casting Process for Corvair Engine, Staff Report..... 2-84
Dealing With Corrosion in Automobiles (tn)..... 2-67
Engine Blocks and Heads Cast by Semi-Permanent Mold Process (tn)..... 3-66
- Bearing metals**
Bearing Steel Properties, by T. L. Carter, E. V. Zaretsky and W. J. Anderson (d)..... 4-174
Better Bearing Alloys, by T. V. Philip, A. E. Nehrenberg and G. Steven (d)..... 5-168
- Beryllium**
Extruding Beryllium and Steel, by Lyle M. Christensen (d)..... 6-162
- Beryllium alloys**
Properties of Beryllium Sheet, by W. V. Ward, M. I. Jacobson and C. O. Matthews (d)..... 3-192
- Biographies**
Peter Payson, a Biographical Appreciation..... 2-110
William A. Pennington, A.S.M.'s President for 1960-61, by Samuel J. Rosenberg..... 5-86
- Blast furnace practice**
Nuclear Stock Gage for Blast Furnace, by Paul D. Johnson (d)..... 6-183-A
- Blast furnaces**
High-Pressure Blast Furnace, by Owen R. Rice (d)..... 4-185
- Bonding**
Adhesives for Fabricating Speed Capsules, by Harold H. Rosenbaum..... 6-80
- Bonding, ceramic to metal**
Brazing Ceramics to Metals, by Leon Lerman..... 3-126
Testing Ceramic-Metal Brazes, by J. Patrick Sterry..... 6-109
- Bonding, diffusion**
Diffusion Bonding Joins Copper and Its Alloys (tn)..... 2-67
- Bonding, steel with plastics**
Bonding Steel With Plastics, by Karl Mohler (d)..... 1-195
- Boron**
Boron in Bearing Steel, by A. I. Falkov (d)..... 1-200
- Brazing**
Brazing Ceramics to Metals, by Leon Lerman..... 3-126
Brazing Missile and Electronic Components in Dry Hydrogen—I, by H. E. Lewis..... 3-93
Brazing Missile and Electronic Components in Dry Hydrogen—II, by H. E. Lewis..... 4-94
Brazing Shortcuts for the B-58, by D. R. Torgeson and J. J. Kenna..... 3-121
Fabricating the Titan Propulsion System, by W. M. Soam..... 3-88
Furnace Brazing of Stainless Steel Assemblies, by H. M. Webber..... 5-108
Metals and Fabrication Methods for the B-70, by Wayne A. Reinsch..... 3-70
New Brazing Furnace for Large Rocket Engines (tn)..... 3-65
Testing Ceramic-Metal Brazes, by J. Patrick Sterry..... 6-109
- Brazing alloys**
Brazing Parts for High-Temperature Service, by E. R. Perry (d)..... 4-163
- Carbides, in alloys**
Carbides in Waspaloy, by J. F. Radavich and W. J. Pennington..... 2-94
- Carbon steel**
Die Quenching Hardens Lean-Steel Channels (tn)..... 4-7
- Carbon steel, fracture**
Brittle Failure of Strong, Tough Steel, by C. E. Mavrocordatos (c)..... 1-130
- Carbon steel, high**
A Century-Old Razor, by Samuel J. Rosenberg..... 6-94
- Carbon steel, transformations**
Estimating Critical Ranges in Heat Treatment of Steels, by R. A. Grange 4-73
- Carburizing**
New Carburizing in German Automobiles, by H. U. Meyer..... 1-70
- Cast iron, nodular**
Graphite Spheres in Ductile Cast Iron, by J. H. Brophy and M. J. Sinnott (d)..... 2-166
- Casting, centrifugal**
Effects of Centrifugal Casting, by N. N. Reutov (d)..... 4-162
Tungsten Shapes Made by Centrifugal Casting (tn)..... 5-9
- Casting, continuous**
Modern Plant Produces Oxygen-Free Copper, by Dragoslav Janicijevic..... 2-112
- Casting, semi-permanent mold**
Engine Blocks and Heads Cast by Semi-Permanent Mold Process (tn)..... 3-66
- Ceramic coating**
Brazing Ceramics to Metals, by Leon Lerman..... 3-126
Refractory Coatings for High-Temperature Protection, by John V. Long..... 3-114
- Chromium electroplate**
Dual Chromium Imparts Longer Life to Auto Parts (tn)..... 6-9

(aa) Atomic Age; (br) Book Review; (c) Correspondence; (cp) Critical Points; (d) Digest; (ds) Data Sheet; (lm) Light Metallurgy; (sr) Short Runs; (tn) Technical News

Cleaning and polishing, mechanical

- New Shot-Blasting Unit Yields Low
Cleaning Costs.....6-112

Coatings

- Surface Coatings Protect Parts During
Heat Treatment, by Etric L. Stone
and Leopold Albertin.....6-103

Columbium

- Oxidation of Columbium, by C. H. Bar-
rett and J. L. Corey (d).....6-176

Columbium alloys

- Fabrication Studies on Columbium Alloy
Sheet, by Andrew F. Trabold and
Steven Bank.....5-103

Copper

- Diffusion Bonding Joins Copper and Its
Alloys (tn).....2-87
Direct-Reduction Copper Plant Planned
for Philippines (tn).....3-87
Modern Plant Produces Oxygen-Free
Copper, by Dragoslav Janicijevic.....2-112

Copper alloys

- Bronzes for Pump Castings, by D. F.
Shepherd (d).....3-204
Zirconium-Copper Alloy . . . High
Strength and Conductivity, by A. E.
Morelock and D. K. Fox.....4-75

Corrosion

- Corrosion by Antifreeze, by H. H.
Collins and R. I. Higgins (d).....3-190
Corrosion Engineers Meet in San Fran-
cisco, by R. C. Bertossa (d).....2-146
Corrosion in Reactors, by A. Draycott
(d).....4-164
Corrosion of Stainless Steel, by Michael
A. Streicher (d).....5-150
Corrosion Resistance of Lead Alloys,
by R. E. Leyman (c).....2-118
Dealing With Corrosion in Automobiles
(tn).....2-87

Corrugating

- Forming Corrugations to Close Toler-
ances, by Arthur Morefield.....3-132

Creep

- Creep of Aluminum, by L. Raymond,
W. D. Ludemann and J. E. Dorn (d).....2-164
Predicting Very-Short-Time Creep Be-
havior for Missiles, by S. F. Frederick
3-88
Predicting Very-Short-Time Creep Be-
havior for Missiles, by S. F. Frederick
(c).....5-114

Creep tests

- Creep Testing Machine Meets British
Emergency, by H. Robson.....1-76
Short-Time Rapid-Heating Tests, by
D. P. Moon and W. F. Simmons (d).....4-156

Diamonds

- Progress in Nonmetallic Materials (tn) 2-68

Die casting

- Die Casting in a Vacuum, by H. K.
Barton (d).....1-178

Diffusion coating

- Diffusion Coatings Improve High-
Temperature Properties (tn).....4-7
Refractory Coatings for High-Tempera-
ture Protection, by John V. Long.....3-114

Documentation

- A.S.M. Documentation Service, by
Marvin Metzger (c).....1-132

Electron microscopy

- The Electron Microscope . . . a New
Tool for Examining Fractures, by
Austin Phillips and Guy V. Bennett. 5-97

Electroplating

- Decorative Plating Abroad, by A. C.
Benning.....1-113
Technology Forecast.....1-68-A

Extrusion

- Extruding Beryllium and Steel, by Lyle
M. Christensen (d).....6-162
Extruding Toolsteel, by J. Sukolski and
G. Hoyle (d).....4-160

Fatigue

- Strain Energy Criterion for Fatigue
Failure, by C. E. Feltner and J.
Morrow (d).....3-218

Fatigue properties

- Endurance of High-Strength Steels, by
H. E. Frankel, J. A. Bennett, and
C. M. Carman (d).....6-178

Finishing

- I—Phosphating in Cold Solutions, by
Robert C. Gibson.....4-100
II—Phosphating in a Nonaqueous Solu-
tion, Staff Report.....4-103

Flaw detection

- Defects That Nondestructive Tests Can
Find (c).....4-114
Detecting Pipe in Rolling, by Werner
Lueckerath, Kurt Fink and Ronald
Flossman (d).....5-172
Inspecting Jet Engine Parts With Eddy
Currents, by R. L. Lippe.....3-129
Inspecting Jet Engine Parts With Eddy
Currents, by E. D. Reilly (c).....5-116
Why Nondestructive Testing Is Needed,
by Robert C. McMaster.....2-70

Flaw detection, magnetic particle

- How to Use Magnetic-Particle Methods,
by L. B. Strader and D. W. Collins.... 4-88

Flaw detection, ultrasonic

- Ultrasonics Solve Testing Problems, by
T. A. LaRoe and E. T. Hughes.....6-86

Forging

- Heat Reflections in Forging, by A. R.
Hardy and J. D. Stringer (d).....6-156
How to Forge Astroloy, by John Luchok 2-91

Forging equipment

- Big Forging Press Shapes Tough Alloys
(tn).....2-66
Program Control for Forging Press and
Manipulator, by Tom Bishop.....1-94

Formability

- A Definition of Scope, by G. de Witte
(c).....4-116
Drawing Aluminum, by Robert W. Bund
(d).....4-185

Forming

- Forming Corrugations to Close Toler-
ances, by Arthur Morefield (sr).....3-132
Trends in Aerospace Manufacturing,
by W. D. Nelson, J. A. Scott and
R. H. Gassner.....4-106
Vibrations Form Metal, by M. Ya.
Karnov and A. A. Voronin (d).....1-190

Foundry practice

- Chevrolet Adopts European Casting
Process for Corvair Engine, Staff
Report.....2-84
Large Steel Castings for Heavy Duty,
by Heinz W. Raister.....1-89

Fracture

- The Electron Microscope . . . a New
Tool for Examining Fractures, by
Austin Phillips and Guy V. Bennett.... 5-97

Fracture, brittle

- Brittle Failure of Strong, Tough Steel,
by C. E. Mavrocordatos (c).....1-130

Fracture tests

- A New Fracture Test for Alloy Steels,
by Derek Hull (c).....2-122

Galvanized steel

- Galvanized Sheet on Automobiles (tn).... 6-7

Gears

- Steel Gears Produced on Automatic
Equipment (tn).....5-9

German metallurgical society

- Centenary of the German Metallurgical
Society, by Kurt Thomas.....1-103

Gold

- Got Any Use for Gold?, by R. Carson
Dalzell (c).....3-136

Graphite

- Graphite Spheres in Ductile Cast Iron,
by J. H. Brophy and M. J. Sinnott
(d).....2-166

H-11 tool steel

- Metals and Fabrication Methods for the
B-70, by Wayne A. Reinsch.....3-70

Hafnium

- Trends in Materials for Reactor Control
Rods, by J. B. Giacobbe.....3-105

Hafnium carbide

- Hafnium Carbides, by R. Kieffer, F.
Benesovsky and K. Messmer (d).....1-196

Hardness and hardness tests

- How Hot Hardness Varies in Tool
Steels, by David P. Hughes.....6-76

Heat-resisting alloys

- Carbides in Waspaloy, by J. F. Radavich
and W. J. Pennington.....2-94
Dyna-Soar . . . a New Technology,
Staff Report.....3-90
Effect of Thermal Cycling on René 41
and Astroloy, by D. P. Moon, J. A.
Van Echo, W. F. Simmons and J. F.
Barker (d).....3-214
High-Temperature Alloys Used for
Tooling (tn).....1-66
How to Forge Astroloy, by John Luchok 2-91
New Alloy for Steam Power Plants (tn) 1-67
A New Cast Alloy for Use at 1900° F.,
by C. G. Bieber and T. E. Kihlgren.... 4-97
A New High-Temperature Alloy, by
John Maxson.....2-97
Nickel-Base Alloys for High-Tempera-
ture Use, by John C. Freche, Thomas
J. Riley and William J. Waters (d).... 6-170
Phase Identification in Nickel-Base
Alloys, by J. E. Wilson and J. F.
Radavich.....5-94
Technology Forecast.....1-68-A

Heat-resisting alloys, coating

- Diffusion Coatings Improve High-Tem-
perature Properties (tn).....4-7

Heat-resisting alloys, heat treatment

- Surface Coatings Protect Parts During
Heat Treatment, by Etric L. Stone
and Leopold Albertin.....6-103

Heat-resisting alloys, machining

- Machining A-286, Solution Treated and
Aged to Brinell 321 (ds).....3-100-B
Problems of Machining Space-Age
Metals, by L. A. Hauser and M. C.
Metzger.....3-97

Heat treating

- Heat Treating in the Fluid-Bed Furn-
ace, by Charles Bennett and Charles
Jung.....4-82
Heating Stainless Steel Flat Products,
by M. R. Ogle.....6-107

Heat treating atmospheres

- Heat Treating and Sintering Stainless
in an Atmosphere, by Bernt A.
Ruediger.....2-101

Heat treating furnaces

- Principles of the Fluid Bed, by J. D.
Stauffer and C. O. Pedersen.....4-78
Quality Competition Leads to Improved
Stainless Strip (tn).....1-67

Heat treatment

- Estimating Critical Ranges in Heat
Treatment of Steels, by R. A. Grange 4-73
Overcoming Distortion and Cracking in
Heat Treating Tool Steels, by Richard
F. Harvey.....6-73
Surface Coatings Protect Parts During
Heat Treatment, by Etric L. Stone
and Leopold Albertin.....6-103
Technology Forecast.....1-68-A

High-strength steel

- Endurance of High-Strength Steels, by
H. E. Frankel, J. A. Bennett and C.
M. Carman (d).....6-178

High-strength steels, machining

- Problems of Machining Space-Age
Metals, by L. A. Hauser and M. C.
Metzger.....3-97

Hydrogen

- Brazing Missile and Electronic Com-
ponents in Dry Hydrogen—I, by H. E.
Lewis.....3-93
Brazing Missile and Electronic Com-
ponents in Dry Hydrogen—II, by H. E.
Lewis.....4-94

In Memoriam

- Ernest E. Thum, 1884-1961.....5-64-A

Inspection and control

- Testing: the Best Quality Insurance
Known (cp).....2-69
Why Nondestructive Testing Is Needed,
by Robert C. McMaster.....2-70

Intermetallic compounds

- Intermetallic Compound Shows Unusual
Magnetic Behavior (tn).....1-66

(aa) Atomic Age; (br) Book Review; (c) Correspondence; (cp) Critical Points; (d) Digest;
(ds) Data Sheet; (lm) Light Metallurgy; (sr) Short Runs; (tn) Technical News

Iron

- Resistance to Cyclic Temperatures, by
M. G. Lozinsky and I. S. Simeonova
(d)4-190

Iron and steel industry

- Changes in West Germany Strengthen
Its Industry (tn).....1-67

Iron and steelmaking

- German Degassing Process Unveiled (tn) 1-65
Iron Making in Africa 100 Years Ago,
by Carter C. Higgins (c).....2-122
Pouring Degassed Steel in an Argon
Atmosphere, by William Wilson.....5-71
Two Fundamentals of All Metallurgical
Operations, by Albert M. Portevin
(c)1-126

Iron and steelmaking, deoxidation practice

- Deoxidizing Steel Melts, by N. N.
Dobrokhotoy (d).....3-198

Iron and steelmaking, direct reduction

- Direct Iron Reduction by Carbon, by
T. S. Yun (d).....2-158

Iron and steelmaking, oxygen furnace processes

- Cooling L-D Baths With Ore, by K.
Grünberg, W. Schleicher and R.
Kunz (d).....6-162
Large Oxygen Unit Serves Open Hearth
Furnaces (tn).....1-67
The L-D Process Today, by O. Cusolea
and K. Rosner (d).....1-198
Outlook for Oxygen in Steelmaking (tn) 5-7
Oxygen in Steelmaking . . . Today and
Tomorrow, by E. F. Kurzinski.....6-97
Technology Forecast.....1-68-A

Iron and steelmaking, vacuum melting

- Consumable-Electrode Melting of Steel's
. . . Present and Future, by W. W.
Dyrkacz5-65

Lead alloys

- Corrosion Resistance of Lead Alloys,
by R. E. Leyman (c).....2-118

Low-temperature alloys

- Selection of Metals for Use at Cryogenic
Temperatures, by A. Hurlich and
J. F. Watson.....4-65
Technology Forecast.....1-68-A
Welding and Heat Treating a 60-Ton
Cryogenic Vessel, by Warren H.
Vetter2-88

Machining

- Machining A-286, Solution Treated and
Aged to Brinell 321 (ds).....3-100-B
Machining AM 350, Solution Treated
and Aged to Bhn 444 (ds).....5-96-B
Machining 6 Al. 4 V Titanium (ds).....4-96-B
Problems of Machining Space-Age
Metals, by L. A. Hauser and M. C.
Metzger3-97
Trends in Aerospace Manufacturing,
by W. D. Nelson, J. A. Scott and
R. H. Gassner.....4-106

Magnesium

- Deforming Single Crystals, by W. L.
Phillips, Jr. (d).....2-170
Magnesium Improves Corrosion Resist-
ance of Hot-Dipped Zinc (tn).....6-9

Magnesium alloys

- British Magnesium Alloys (ds).....1-100-B

Magnesium die castings

- Magnesium Castings in Europe, by E.
Sayles1-97

Metallography

- Grand Prize, 15th A.S.M. Metallographic
Exhibit5-88
New Metallographic Techniques, by
Pierre A. Jacquet (d).....3-210

Metallography, specimen preparation

- Diallyl Phthalate as a Mounting Mate-
rial, by C. A. Godden (c).....4-114

- Improved Metallographic Techniques in
Nova Scotia, by C. A. Godden.....1-121
Preparing Titanium for Microscopic
Examination, by W. C. Coons.....6-93

Metallurgy, education

- Trends in Engineering Education in
Canada (tn).....1-68

Metallurgy, history

- International Figures in the History
of the Man-Made Metal Plutonium, by
Arthur S. Coffinberry.....1-84

Metallurgy, research

- Metallurgical Progress in Canada, by
Harold J. Roast.....1-117

Microscopy

- Odd Structure in Tungsten, by R. H.
Thielemann (c).....3-136
Squares and Rectangles, by A. D.
McMaster, F. K. Blechinger and F. W.
Kuntz6-68

Missiles

- Brazing Missile and Electronic Compo-
nents in Dry Hydrogen—I, by H. E.
Lewis3-93
Brazing Missile and Electronic Compo-
nents in Dry Hydrogen—II, by H.
E. Lewis4-94
Dyna-Soar . . . A New Technology,
Staff Report3-90
Fabricating the Titan Propulsion Sys-
tem, by W. M. Boam3-83
For Stronger Missile Cases . . . De-
carburiel, by John M. Lynch.....3-79
Materials and Fabrication Methods for
the Bomarc, by R. H. Nelson3-107
Materials for Uncooled Rocket Nozzles,
by A. V. Levy3-81
New Brazing Furnace for Large Rocket
Engines (tn).....3-65
Predicting Very-Short-Time Creep Be-
havior for Missiles, by S. F. Freder-
ick (c).....5-114

Gassner4-106

Molybdenum, in steel

- New Carburizing in German Automot-
biles, by H. U. Meyer1-70

National Association of Corrosion Engineers

- Corrosion Engineers Meet in San Fran-
cisco, by R. C. Bertossa (d)2-146

Nickel alloys

- Effect of Thermal Cycling on René 41
and Astroloy, by D. P. Moon, J. A.
Van Echo, W. F. Simmons and J. F.
Barker (d).....3-214
How to Forge Astroloy, by John
Luchok2-91
A New Cast Alloy for Use at 1900° F.,
by C. G. Bieber and T. E. Kihlgren.....4-97
A New High-Temperature Alloy, by
John Maxson2-97
Nickel-Base Alloys for High-Tempera-
ture Use, by John C. Freche, Thomas
J. Riley and William J. Waters (d).....6-170

Nickel alloys, phases

- Phase Identification in Nickel-Base Al-
loys, by J. E. Wilson and J. F. Rada-
vich5-94

Nitriding

- Electronic Nitriding, by H. Knüppel, K.
Brotzmann and F. Eberhard (d)5-164
Nitriding Titanium (d).....4-172

Nonmetallic materials

- Fabricating the Titan Propulsion Sys-
tem, by W. M. Boam3-83
Materials for Uncooled Rocket Nozzles,
by A. V. Levy3-81
Progress in Nonmetallic Materials
(tn).....1-68
Progress in Nonmetallic Materials
(tn).....2-68
Progress in Nonmetallic Materials
(tn).....3-67
Progress in Nonmetallic Materials
(tn).....4-10
Progress in Nonmetallic Materials
(tn).....5-10

Nuclear gage

- Nuclear Stock Gage for Blast Furnace,
by Paul D. Johnson (d)6-183-A

Nuclear materials

- Nuclear Experts Meet on West Coast,
by R. C. Bertossa (d)6-140
Uses for Depleted Uranium, by H. W.
Nelson and R. L. Carmichael (d)6-152

Nuclear radiation

- How Radiation Affects Metals, by A.
H. Cottrell (d)1-194
Radiation Damage, by D. E. Thomas;
R. E. Smallman (d)5-174

Nuclear reactors

- Corrosion in Reactors, by A. Draycott
(d).....4-164
Design and Manufacture of Reactor
Vessels, by D. K. Davies3-101
Steel for Nuclear Reactors, by H. F.
Beeghly (d)6-164
Trends in Materials for Reactor Con-
trol Rods, by J. B. Giacobbe3-105

Nuclear reactors, fuel elements

- Improved Fuel Elements, by Frank K.
Pittman (aa)4-93

Open hearth processes

- Large Oxygen Unit Serves Open Hearth
Furnaces (tn).....1-67

Oxygen

- Outlook for Oxygen in Steelmaking
(tn).....5-7
Oxygen in Steelmaking . . . Today and
Tomorrow, by E. F. Kurzinski.....6-97

Paper industry

- Welded Overlays for Corrosion Resis-
tance (sr)2-116

Phosphate coating

- I—Phosphating in Cold Solutions, by
Robert C. Gibson4-100
II—Phosphating in a Nonaqueous Solu-
tion, Staff Report.....4-103

Piston rings

- Sintered Iron Piston Rings, by Robert
Talmage5-89

Plutonium

- International Figures in the History of
the Man-Made Metal Plutonium, by
Arthur S. Coffinberry1-84

Powder metal compacts

- Metal Powder Compacted in Big Gun
Barrel (tn).....3-67
Sintered Iron Piston Rings, by Robert
Talmage5-89

Powders, metal

- Explosive compacting, by W. T. Mont-
gomery and H. Thomas (d)6-178
New Powder Technique Reduces Arma-
ture Costs (tn).....6-9

Quenching

- Die Quenching Hardens Lean-Steel
Channels (tn).....4-7
More on Oil-Water Quenchants, by Rob-
ert T. Hook (c)1-136

Railroad wheels

- Defects in Railroad Wheels, by J. M.
Wandrisco and F. J. Dewez, Jr. (d).....4-178

Rare-earth metals

- Trends in Materials for Reactor Control
Rods, by J. B. Giacobbe3-105

Rare-earth sulfides

- Rare-Earth Sulfides Used as Thermo-
electric Materials (tn)5-8

Razor

- A Century-Old Razor, by Samuel J.
Rosenberg6-94

Refractory materials

- Progress in Nonmetallic Materials
(tn)1-68

(aa) Atomic Age; (br) Book Review; (c) Correspondence; (cp) Critical Points; (d) Digest;
(ds) Data Sheet; (lm) Light Metallurgy; (sr) Short Runs; (tn) Technical News

Refractory metals

- Aging Refractory Metals, by A. C. Ingram (d) 3-172
Dyna-Soar . . . a New Technology, Staff Report 3-90
High Purity: Key to Refractory Metals (tn) 4-8

- Red Cloud in the East (cp) 1-69

Sandwich structures

- Hot Rolling Welds Sandwich Panels (tn) 5-9

Shear forming

- Shear Forming Reduces Costs of Rocket Cases (tn) 2-67

Single crystals

- Deforming Single Crystals, by W. L. Phillips, Jr. (d) 2-170

Solder

- In Solder, Flux Makes the Difference, by Joseph D. Keller (sr) 4-111

Solidification

- Hot Tearing of Low-Carbon Steel, by O. D. Moldavskii and A. P. Pronov (d) 6-167

Stainless steel

- AM 355 for Gas Turbine Engines, by Paul A. Bergman 5-79
Controlled Transformation Stainless Steels, by K. J. Irvine, D. T. Llewellyn and F. B. Pickering (d) 6-183
Furnace Brazing of Stainless Steel Assemblies, by H. M. Webber 5-108
Materials and Fabrication Methods for the Bomarc, by R. H. Nelson 3-107
Metals and Fabrication Methods for the B-70, by Wayne A. Reinsch 3-70
Quality Competition Leads to Improved Stainless Strip (tn) 1-67
Selection of Metals for Use at Cryogenic Temperatures, by A. Hurlich and J. F. Watson 4-65
Stainless Steel Used in Auto Mufflers (tn) 3-66
Welding and Heat Treating a 60-Ton Cryogenic Vessel, by Warren H. Vetter 2-88

Stainless steel, corrosion

- Corrosion of Stainless Steels, by Michael A. Streicher (d) 5-150
Higher Aging Temperature Prevents Corrosion of 17-4 PH (tn) 6-8

Stainless steel, heat treating

- Heat Treating and Sintering Stainless in an Atmosphere, by Bernt A. Ruediger 2-101
Heating Stainless Steel Flat Products, by M. R. Ogilvie 6-107
Vacuum Furnaces Are Versatile, by H. W. Western 2-106

Stainless steel, machinability

- Aluminum Improves Free-Machining Stainless Steel (tn) 4-8
Machining AM 350, Solution Treated and Aged to Bhn. 444 (ds) 5-96-B

Stainless steel, welding

- Welding Stainless by Electron Beam, by C. R. Lehmann and E. G. Littell 3-125

Stainless steel castings

- Gas Turbine for Trucks Uses High-Alloy Castings (tn) 4-9
Large Steel Castings for Heavy Duty, by Heinz W. Balster 1-89

Steel

- Steel for Nuclear Reactors, by H. F. Beeghly (d) 6-164

Steel, decarburization

- For Stronger Missile Cases . . . Decarburize!, by John M. Lynch 3-79

Steel, degassing

- Degassing Unit for Foundry, by J. K. Dietz (d) 4-190
Decarburizing Steels by Vacuum, by G. E. Danner and E. Dyble 5-75
German Degassing Process Unveiled (tn) 1-65
Pouring Degassed Steel in an Argon Atmosphere, by William Wilson 5-71

Steel, extrusion

- Extruding Beryllium and Steel, by Lyle M. Christensen (d) 6-162

Steel, fracture

- Rail Steel Withstands Atomic Blast, by R. H. Carlson and J. P. Murtha (d) 4-154

Steel, heat treating

- Surface Coatings Protect Parts During Heat Treatment, by Etric L. Stone and Leopold Albertin 6-103

Steel, surface treatment

- Impregnating Steel With Titanium, by A. N. Minkevich and A. Gvozdev (d) 3-224

Steel, tempering

- Tempering Steel, by J. L. Aston (d) 5-182

Steel, transformations

- Phase Transformations, by L. F. Porter and P. C. Rosenthal (d) 5-158
Rapid Recrystallization of Steel, by F. K. L'vov (d) 1-192

Steel castings

- Hot Tearing of Low-Carbon Steel, by O. D. Moldavskii and A. P. Pronov (d) 6-167
Large Steel Castings for Heavy Duty, by Heinz W. Balster 1-89

Steel ingots

- Big Ingots Cast of Vacuum-Degassed Steel (tn) 6-8
New Casting Practice Yields Improved Forging Ingots (tn) 4-9

Stress relief

- Drilling Holes to Measure Residual Stresses, by Arthur J. Bush 5-91

Temperature control

- Automatic Temperature Control (d) 3-205

Temperature measurement

- New Potentiometers Use Strain-Gage Principle (tn) 2-65

Tempering

- Tempering Steel, by J. L. Aston (d) 5-182

Thermal properties

- Determining Thermoelectric Properties (d) 4-188
Resistance to Cyclic Temperatures, by M. G. Lozinsky and I. S. Simeonova (d) 4-190

Thermoelectric materials

- Rare-Earth Sulfides Used as Thermoelectric Materials (tn) 6-8

Thickness measurement

- Measuring Thicknesses in Hard-to-Reach Areas (sr) 5-112

Titanium

- Impregnating Steel With Titanium, by A. N. Minkevich and A. Gvozdev (d) 3-224
Nitriding Titanium (d) 4-172
Preparing Titanium for Microscopic Examination, by W. C. Coons 6-93
Welded Titanium Coils Heat Acid Solution (tn) 1-66

Titanium, corrosion

- Titanium Fan Holds Up in Corrosive Atmosphere (tn) 6-10

Titanium alloys

- Machining 6 Al, 4 V Titanium (ds) 4-96-B
Materials and Fabrication Methods for the Bomarc, by R. H. Nelson 3-107
Metals and Fabrication Methods for the B-70, by Wayne A. Reinsch 3-70
Selection of Metals for Use at Cryogenic Temperatures, by A. Hurlich and J. F. Watson 4-65

Titanium alloys, tensile properties

- Tensile Properties of Titanium Alloy, by Howard L. Price (d) 5-154

Tool steel

- Better Air-Hardening Tool Steels, by Neil J. Culp 6-70
Classification and Selection of Tool Steels (ds) 6-96-B
Extruding Toolsteel, by J. Sukolski and G. Hoyle (d) 4-160
How Hot Hardness Varies in Tool Steels, by David P. Hughes 6-76

Tool steel, heat treating

- Overcoming Distortion and Cracking in Heat Treating Tool Steels, by Richard F. Harvey 6-73

Tool steel, high speed

- High Speed Steels Meet Tool Needs—I, by Peter Payson 6-65

Tungsten

- Odd Structure in Tungsten, by R. H. Thielemann (c) 3-136
Tungsten Shapes Made by Centrifugal Casting (tn) 5-9

Ultrasonics

- A New Alloy Production Process, by G. I. Pogodin-Alekseev and V. V. Zabolcev-Zotov (d) 5-162
Ultrasonics Solve Testing Problems, by T. A. LaRoe and E. T. Hughes 6-86

Ultrasonics, use in metallurgy

- How the Russians Are Using Ultrasonics in Metallurgy, by Arthur B. Tesmen 1-79

Uranium

- Controlled Impurities in Uranium (tn) 5-9
Uses for Depleted Uranium, by H. W. Nelson and R. L. Carmichael (d) 6-152

Vacuum degassing

- D-H Vacuum Unit Degasses Production Heat (tn) 6-7

Vacuum furnaces

- Larger Vacuum Furnaces Go Into Operation (tn) 2-67
Vacuum Furnaces Are Versatile, by H. W. Western 2-106

Vacuum processes

- Die Casting in a Vacuum, by H. K. Barton (d) 1-178

Vapor deposition coating

- Vapor Deposition of Metal, by Yu. V. Grdina and L. T. Gordeeva (d) 3-216

Vibration forming

- Vibrations Form Metal, by M. Ya. Karnov and A. A. Voronin (d) 1-190

Vitreous enamel blisters

- Blisters in Vitreous Enamels, by Gordon P. K. Chu, E. R. Evans and A. D. Morgan (d) 1-199

Weld metal, hot cracking

- Hot Cracking of Weld Metal, by M. Kh. Shornhorov and V. S. Sedykh (d) 1-198

Welded overlays

- Welded Overlays for Corrosion Resistance (sr) 2-116

Welding

- Learn More About Welding, by Simon A. Greenberg (c) 4-114
Status of Welding Processes in Europe, by Maximilian Komers 1-107
Two-Pass Welding of Thick Aluminum Plates (tn) 3-66
Welding Engineers Meet in California, by R. C. Bertossa (d) 4-124
Welding Engineers Meet in California, by R. C. Bertossa (d) 5-136

Welding, electron beam

- Welding Stainless by Electron Beam, by C. R. Lehmann and E. G. Littell 3-125

Weldments, stress relieving

- Stress-Relieving Large Weldments by Radiant Heating, by Tom Bishop (sr) 1-124

Western Metal Congress

- 12th Western Metal Congress Consolidated Program 3-68
New Ideas on Aerospace Materials Highlight Western Metal Congress and Exposition 4-11

Zinc

- Deforming Single Crystals, by W. L. Phillips, Jr. (d) 2-170

Zinc, corrosion

- Magnesium Improves Corrosion Resistance of Hot-Dipped Zinc (tn) 6-9

Zirconium alloys

- Oxygen in Zircaloy-2, by L. S. Rubenstein, J. G. Goodwin and F. L. Shubert (d) 2-154
Squares and Rectangles, by A. D. McMaster, F. K. Blechinger and F. W. Kuntz 6-68

METAL PROGRESS

THE MAGAZINE OF MATERIALS AND PROCESS ENGINEERING

Volume 80
July 1961 through December 1961

ALLEN G. GRAY, *Editor;*
Editor, Periodical Publications, ASM

RALPH G. DERMOTT, *Managing Editor (On Leave, USNR)*

CARL R. WEYMUELLER
Associate Editor

JOSEPH E. FOSTER
Associate Editor

FRED L. SIEGRIST
Assistant Editor

ELIZABETH M. ALDRICH
Assistant Editor

FLOYD E. CRAIG, *Art Director*

Metal Progress Is Owned and Published by

THE AMERICAN SOCIETY FOR METALS

Metals Park, Ohio

Subject Index

The subject headings used in this index are chosen in accordance with the ASM-SLA Metallurgical Literature Classification, International (Revised) Edition, published by the American Society for Metals, 1958.

- Abrasion resistance**
Testing Protective Coatings on Metals, by Paul Smits..... 3-75
- Air pollution control**
From Here and There . . . Control of smoke and fume effluence from open-hearth furnaces (*tn*)..... 2-10
- Aircraft**
The Effects of Strain Rate and Temperature on Metals, by J. R. Kattus..... 6-85
Nucleonics in Flight, by W. J. Hendry and Walter J. Koshuba (*d*)..... 2-132
Two Superalloys for Jet Engines . . . Udimet 700, a Wrought Alloy, by I. S. Servi and W. J. Boesch; and IN-100, a Cast Alloy, by S. F. Sternasty and E. W. Ross..... 6-73
Vacuum Melting Improves Properties of H11 Steel, by P. E. Ruff and R. W. Steur..... 6-79
What Tool Steel Shall I Use . . . for Applications in Structures and Components?, Staff Report..... 4-104
- Alloy steel, nitriding**
A New Nitriding Process from Germany, Staff Report..... 1-77
- Alloy steel for turbine rotors**
German Commentary on Turbine Failures, by S. Ammareller and P. Gruen. 2-89
- Aluminum alloys**
Aluminum 2219 . . . New Alloy for High-Strength Welded Structures, by F. R. Collins, F. G. Nelson and I. B. Robinson..... 6-82
Aluminum Alloys for Reactors, by E. C. W. Perryman (*d*)..... 6-163
The Effects of Strain Rate and Temperature on Metals, by J. R. Kattus..... 6-85
Forming and Finishing Aluminum Auto Trim (*c*)..... 3-118
From Here and There . . . Railroad hopper made from aluminum alloy (*tn*)..... 6-10
Improvement in the Anodizing Properties and Corrosion Resistance of Aluminum Alloys by Hyper-Hotworking, by J. Hérengruel and P. LeLong (*d*)..... 3-166
A New High-Strength Aluminum Alloy, by J. A. Nock, Jr., Marshall Holt, and D. O. Sproles..... 3-87; (*c*) 6-114
Stress-Corrosion Immunity for 7075 Aluminum Alloy (*tn*)..... 1-8
Welding 2219 Aluminum for Bombs and Fuel Tanks, by Stanley L. Sears and Richard S. Crial..... 5-88
What Metal Shall I Use . . . for Die Castings, Staff Report..... 4-97
What Metal Shall I Use . . . for Fabrication of Cryogenic Vessels and Equipment?, by George H. Zenner..... 4-114
What Metal Shall I Use . . . for High-Strength Welded Structures?, Staff Report..... 4-121
- Aluminum alloys, anodizing**
Forming and Finishing Aluminum Auto Trim, Staff Report..... 1-67
- Aluminum alloys, applications**
Huge Aluminum Vessels Store Liquid Hydrogen (*tn*)..... 1-7
- Aluminum alloys, welding**
Residual Welding Stresses in Aluminum Alloys, by H. N. Hill..... 2-92
- Aluminum coating**
Hot-Dipped Aluminum Coats Steel Fasteners (*tn*)..... 1-9
- Anisotropy**
Deformation of Metastable Austenite . . . an Interim Report on a New Process, by V. F. Zackay, W. M. Justason, and D. J. Schmatz..... 3-68
- Automation**
Punch Card Controls for Heat Treating (*tn*)..... 6-7
- Automobiles, trim, finishing**
Forming and Finishing Aluminum Auto Trim, Staff Report..... 1-67
- Automotive applications**
What Steel Shall I Use . . . for Heat Treated Parts in Automobiles, Trucks and Tractors?, Staff Report..... 4-66
- Bearing materials**
Recent High-Temperature Bearing Developments, by John H. Johnson (*d*)..... 3-162
What Metal Shall I Use . . . for Bearings To Be Employed at Elevated Temperatures?, by H. M. Lampert..... 4-101
- Bearings**
What Tool Steel Shall I Use . . . for Applications in Structures and Components?, Staff Report..... 4-107
- Beryllides**
Beryllides—New High-Temperature materials (*tn*)..... 6-9
- Beryllium**
Beryllium Corp. Dedicated New Plant (*tn*)..... 5-10
- Bimetals**
What Metal Shall I Use . . . for Resistance-Welded Thermostats?, by Raymond M. Sears..... 4-133
- Biography**
John Burin Johnson..... 6-90
- Bonding**
Materials Progress in Organic Adhesives (*tn*)..... 4-131
- Brazing**
Brazing of Components for Small Gas Turbine Engines, by M. J. Stern..... 3-101
Calculating Cycles for Brazing, by H. M. Lampert, Jr..... 3-106
Progress in Brazing (*d*)..... 1-132
What Metal Shall I Use . . . for Fabrication of Cryogenic Vessels and Equipment?, by George H. Zenner..... 4-154
- Brazing alloys**
The Evolution of Ductile High-Temperature Brazing Alloys, by D. C. Herrschaft..... 3-97
Ternary Systems for Ductile Brazing Alloys, by D. C. Herrschaft (*ds*)..... 3-96B
- Business machines applications**
The Metallurgist's Role in Selecting Materials for Business Machines, by D. C. Williams..... 4-79
What Steel Shall I Use . . . for Heat Treated Parts in Business Machines and Home Appliances?, Staff Report..... 4-77
- Cadmium**
Cadmium Plating Can Embrittle Ultrahigh-Strength Steels, by Norman M. Geyer, G. William Lawless and Bennie Cohen (*d*)..... 6-154
- Carbon**
Carbon and Graphite in the Metallurgical Industries, by Neal J. Johnson, V. J. Nolan and J.W. Shea (*d*)..... 6-138
- Carbon steel**
Columbium-Treated Mild Carbon, Semi-killed Steels, by C. L. Altenburger (*d*)..... 5-177
Mechanisms of Boundary Lubrication—Boundary Lubrication of Copper, Mild Steel and Stainless Steel During Severe Cold Deformation, by P. R. Lancaster and G. W. Rowe (*d*)..... 5-163
What Metal Shall I Use . . . for Fabrication of Cryogenic Vessels and Equipment?, by George Zenner..... 4-112
- Carbon steel, nitriding**
A New Nitriding Process from Germany, Staff Report..... 1-77
- Carbon steel, scale**
A Magnetite Seam at the Scale-Metal Interface on Mild Steel, by K. Sachs and G. T. F. Jay (*d*)..... 1-161
- Cast stainless steel**
Cast Chromium-Nickel Stainless Steels for Superior Resistance to Stress Corrosion, by M. G. Fontana, F. H. Beck and J. W. Flowers..... 6-99
- Casting, centrifugal**
Centrifugal Casting of Thin-Walled Magnesium Parts, by Warren C. Smith..... 2-101
- Castings**
Specifications and Properties of Nodular (Ductile) Iron Castings (*ds*)..... 6-96B
- Cladding steel**
New Techniques for Cladding with the Gas-Shielded Process, by Ralph D. Engel (*d*)..... 5-182
- Coatings**
Flame-Sprayed Coatings, by Frantisek Princ (*d*)..... 1-143
From Here and There . . . Cu-Sn alloy for coating fine wire (*tn*)..... 4-131
Hot-Dipped Aluminum Coats Steel Fasteners (*tn*)..... 1-9
New Method for Producing Metallic Coatings (*tn*)..... 2-8
On the Properties and Structure of Phosphate Coatings, by V. Cupr (*d*)..... 1-172
Plasma-Arc Device Deposits Metal Overlays (*tn*)..... 4-13H
Silicone Coatings Reduce Scale Formation (*tn*)..... 4-13H
Testing Protective Coatings on Metals, by Paul Smits..... 3-75
Titanium Nitride: an Oxidizable Coating for High-Temperature Protection of Graphite, by N. T. Wakelyn (*d*)..... 6-143
What Precoated Metal Shall I Use?, Staff Report..... 4-128
Zn Coatings Keep Cb From Oxidizing at Elevated Temperatures, by W. D. Klopp and C. A. Krier (*d*)..... 6-158
- Cobalt**
From Here and There . . . Commercially pure cobalt available in strip form (*tn*)..... 5-10
- Cobalt in stainless steel**
The Corrosion Resistance of Some Stainless Steels Alloyed With Cobalt, by D. Coutouradis (*d*)..... 1-142
- Cold working**
Strain Strengthening of Type 304 Stainless Steel, by Walter Hamer, Jr., Leonard Stemann and E. E. Weissmantel (*d*)..... 5-180
- Columbium**
Columbium-Treated Mild Carbon, Semi-killed Steels, by C. L. Altenburger (*d*)..... 5-177
Melting and Casting of the Refractory Metals Molybdenum, Columbium, Tantalum, and Tungsten, by W. H. Johnson (*d*)..... 5-138
What Metal Shall I Use . . . for High-Strength Welded Structures?, Staff Report..... 4-116
Refractory Metals in Europe—a Growing Field, by R. I. Jaffee (*d*)..... 6-151
Zn Coatings Keep Cb From Oxidizing at Elevated Temperatures, by W. D. Klopp and C. A. Krier (*d*)..... 6-158
- Columbium alloys**
Columbium Steel Passes Pipeline Test (*tn*)..... 4-13F
From Here and There . . . Cu-Sn alloy for coating fine wire (*tn*)..... 4-131
From Here and There . . . Magnesium in thermonuclear research (*tn*)..... 1-10
A Metal for Service at Both Cryogenic and Ultrahigh Temperatures, by H. R. Ogden and I. Perlmutter..... 5-97
Superconducting Alloys Fabricated into Wire Form (*tn*)..... 3-9
Two Columbium Alloys for High-Temperature Applications (*tn*)..... 4-13G
What Refractory Metal Shall I Use . . . for Ultrahigh-Temperature Applications (Above 1800° F.)?, by D. J. Maykuth and H. R. Ogden..... 4-92

Cortes.....2-97 Investigations of the Deterioration of 22 Refractory Materials in a Mach Number 2 Jet at a Stagnation Temperature of 3800° F., by B. W. Lewis (d).....6-186 Large Electron-Beam Furnace Refines Refractory Metals (tn).....2-9 Melting and Casting of the Refractory Metals Molybdenum, Columbium, Tantalum and Tungsten, by W. H. Johnson (d).....5-138 Metals for Today and Tomorrow, by Julius J. Harwood (d).....3-142 Refractory Metals in Europe—a Growing Field, by R. I. Jaffee (d).....6-151 Thermocouples for Ultrahigh Temperatures, by J. C. Lachman.....1-73 What Refractory Metal Shall I Use . . . for Ultrahigh-Temperature Applications (above 1800° F.)?, by D. J. Maykuth and H. R. Ogden.....4-92 Salt baths How Water Affects Quenching Rates of Salt Baths (tn).....2-9 Secondary hardness High Speed Steels Meet Tool Needs, by Peter Payson—II.....1-91 Semiconductor materials Metals for Today and Tomorrow, by C. Sheldon Roberts (d).....3-156 Semiconductors Continuous Vacuum furnace Processes Diodes (tn).....6-9 Soldering What Metal Shall I Use . . . for Fabrication of Cryogenic Vessels and Equipment?, by George H. Zenner.....4-154 Spark hardening Spark Hardening of Metals, by N. C. Welsh (d).....2-164 Spin forging Missile Chamber Skirt Fabricated by Spin Forging (tn).....6-8 Stainless steel Abnormal Grain Growth in Austenitic Alloys, by B. Cina (d).....5-163 Effects of Alloying Additions on Hot Cracking of Austenitic Chromium-Nickel Stainless Steels, by Frederick C. Hull (d).....5-192 From Here and There . . . Armco Steel Corp. produces 18-9 LW alloy (tn).....5-10	Stainless steel, annealing Heat Treating Stainless Steel Tubing and Wire, by C. H. Vaughan.....1-108 Stainless steel, machining Machining Type 410 Stainless Steel, Quenched and Tempered to Rockwell C-45 (ds).....1-96B Stainless steel, nitriding Gas Nitriding of Stainless Steel, by V. J. Coppola.....1-83 Stainless steel corrosion Comparative Data on the Corrosion Resistance of Selected Types of 18-8 Chromium-Nickel Stainless Steels, by K. L. Sanborn (d).....1-140 The Corrosion Resistance of Some Stainless Steels Alloyed With Cobalt, by D. Coutouradis (d).....1-142 Why Does Stainless Steel Corrode?, by Morgan Sinclair and Eugene Phillips.....3-92 Steel, aluminum dip coated Hot-Dipped Aluminum Coats Steel Fasteners (tn).....1-9 Steel castings Effect of Al and N on the Occurrence of Intergranular Fracture in Steel Castings, by B. C. Woodfine and A. G. Quarrell (d).....5-158 Steel Castings Uses, Properties and Design (br), by W. K. Bock.....1-85 Stress corrosion Cast Chromium-Nickel Stainless Steels for Superior Resistance to Stress Corrosion, by M. G. Fontana, F. H. Beck and J. W. Flowers.....6-99 Stress-Corrosion Immunity for 7075 Aluminum Alloy (tn).....1-8 Stress-corrosion cracking Stress-Corrosion Cracking—a Nontechnical Introduction to the Problem, by Warren E. Berry (d).....5-170 Superconducting alloy From Here and There . . . Magnet used in thermonuclear research (tn).....1-10 Superconducting Alloys Fabricated into Wire Form (tn).....3-9 Tantalum Melting and Casting of the Refractory Metals Molybdenum, Columbium, Tantalum, and Tungsten, by W. H. Johnson (d).....5-138 Refractory Metals in Europe—a Growing Field, by R. I. Jaffee (d).....6-151 Tantalum alloys A Metal for Service at Both Cryogenic and Ultrahigh Temperatures, by H. R. Ogden and I. Perlmutter.....5-97 What Refractory Metal Shall I Use . . . for Ultrahigh-Temperature Applications (Above 1800° F.)?, by D. J. Maykuth and H. R. Ogden.....4-92 Tellurium steel Tellurium Improves Machinability of Steel (tn).....5-8 Temperature control Temperature Control in Titanium Processing, by P. C. Barr.....5-71 What Metal Shall I Use . . . for Resistance-Welded Thermostats?, by Raymond M. Sears.....4-133 Temperature conversions Temperature Conversion Formulas, by Julian I. Kycia (c).....1-114 Testing, short time Strength of Structural Alloys Under Rapid Heating and Loading, by J. R. Kattus and D. W. McDowell, Jr. (d).....2-144

Vacuum melting furnace Consumable Electrode Vacuum Furnace With Lazy-Susan Device (tn).....	5-8
Wear and lubrication Some Studies of Wear and Lubrication, by A. W. Crook (d).....	2-154
Weld metal, impact properties Factors Which Affect Low-Alloy Weld Metal Notch Toughness, by Stanley S. Sagan and Hallock C. Campbell (d).....	1-170
Weldable alloys Designing a Weldable Alloy Using Met- allurgical Parameters, by W. N. Platte.....	3-80
Welded structures Aluminum 2219 . . . New Alloy for High-Strength Welded Structures, by F. R. Collins, F. G. Nelson and I. B. Robinson.....	5-82
Stainless Steels for High-Strength Welded Structures and Components, Staff Report.....	5-100
What Metal Shall I Use . . . for High- Strength Welded Structures?, Staff Report.....	4-116
Welding The Fabrication of Thin-Wall Molyb- denum Shapes by Welding, by W. F. Brown and M. A. Pugacz (d).....	5-178
Flash Welding Copper to Steel, by Hermann W. Stieglitz (sr).....	5-112
"Hot Box" Protects Parts During Welding, by John W. Holzwarth (sr).....	3-112
How to Make Reliable Seam and Spot Welds in René 41, by B. M. Wahlin and D. R. Coles.....	6-67
Thick-Walled Pipe Made by High- Frequency Welding (tn).....	2-7
"Upset" Situation . . . Two dissimilar alloys butt welded and "upset", by R. B. Fisher (c).....	5-114
Welded Ferritic Steel Construction for Intermediate Low-Temperature Serv- ice, by A. A. Wells (d).....	5-172
Welding 2219 Aluminum for Bomarc Fuel Tanks, by Stanley L. Sears and Richard S. Crial.....	5-88
Welding, alloy steel Better Motor Cases for Missiles . . . III—Advanced Fabrication Methods, by R. E. Heise.....	1-105
Welding, arc, gas shielded Automatic Welding Gun Makes Leak- Proof Welds (tn).....	1-9
Welding, resistance Vapor-Cooled Resistance Welder Speeds Pipe Production (tn).....	1-8
Welding, stresses Residual Welding Stresses in Aluminum Alloys, by H. N. Hill.....	2-92
Welding overlays Plasma-Arc Device Deposits Metal Overlays (tn).....	4-13H
Wire drawing Mechanisms of Boundary Lubrication— Boundary Lubrication of Copper, Mild Steel and Stainless Steel During Severe Cold Deformation, by P. R. Lancaster and G. W. Rowe (d).....	5-163
Zinc Zn Coatings Keep Cb From Oxidizing at Elevated Temperatures, by W. D. Klopp and C. A. Krier (d).....	6-158
Zinc alloys Miniature Zinc Die Castings Offer Cost Advantages (tn).....	5-7
More Zinc for Automobiles (tn).....	6-9
What Metal Shall I Use . . . for Die Castings, Staff Report.....	4-97
Powder Technique Produces Dense Zircaloy-2 Parts (tn).....	1-8
Zirconium Aluminum Alloys for Reactors, by E. C. W. Perryman (d).....	6-163
Zirconium alloys From Here and There . . . Magnet used in thermonuclear research (tn).....	1-10
